

Repeal Appendix A

This appendix is deleted because its contents have been incorporated into the Standard Plan Approval processes for foundation and engineered tiedown systems. This is necessary to maintain consistency in the plan approval process and because the procedure for approving standard plans of these items are identical.

Repeal Appendix B

This appendix is deleted because it is unnecessary. The procedures for construction and approval of Building Systems are already specified in Title 25, Chapter 3, Subchapter 1 commencing with section 3000.
